2.00

Course Description

As the global economy becomes more competitive and uncertain, businesses equipped with effective Supply Chain Management (SCM) can enhance financial performance, mitigate risks, and respond to disruptions more effectively. This course offers a comprehensive overview of supply chain management from strategy to each function within the supply chain. In addition, the course covers contemporary topics such as the Covid-19 pandemic, global supply chains, resilience, and sustainability. Classes consist of lectures, short video clips, interactive discussions, individual case study assignments, group case studies, and presentations.
