COMPUTING FOR PRACTICAL STATISTICS

**UCEAP Transcript Title**

COMP/PRACTICL STATS

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course aims to extend students' practical experience of statistical software environments; to extend students' abilities in applying ideas and methods already taught in a practical context, and to enable students to perform computer-assisted statistical analyses. It is intended for second and third year students registered on the undergraduate degree program offered by the Department of Statistical Science, or jointly with other departments. On successful completion of the course, a student should be able to independently perform a systematic analysis with the statistical software suites R and SAS to answer data-based or methodological questions, and report on it according to the scientific state-of-the-art.
