## Course Description

This course provides students with an analytical framework and empirics to think about a wide variety of issues in international finance: the current account and balance of payments accounting; inter-temporal trade; the determination of exchange rates; monetary and fiscal policy under fixed and flexible exchange rates; a number of major puzzles in international finance. When time permits, this course also covers a number of relevant current issues: sovereign default, international financial crisis, and monetary unions.

Prerequisites: Intermediate Microeconomics, Intermediate Macroeconomics, Mathematics for Economists. Please note that you must have working knowledge of calculus and statistics, because this class mainly deals with mathematical economic models.
