2.70

Course Description

This course is very broad and covers both the Micro-level analyses of nerve cell processes and the macro-level analyses of cultural systems. It's designed to give an overview of topics within the field of psychology, such as perception, attention, memory, language, emotion, motivation, and personality et al. Students will be introduced to the basics of the scientific method, so that they could use solid scientific research to combat with psychological misconceptions.
