Course Description
The course is an overview of how economic thought has risen over the centuries, and how, since World War II, it has influenced neighboring disciplines such as political philosophy, common law, political science, sociology and psychology. The following topics are govered: globalization, free trade, growth and its possible end, inequalities, shifts in labor market. From Gilgamesh to Neuroeconomics, from Aristotle to Deep Learning and High Frequency Trading, this course contextualizes contemporary debates and underlines how economics' way of thinking is now one of, if not the dominant scheme in our lives, whether it is at individual, societal, or planetary levels.
