UCEAP Transcript Title GLOBAL HEALTH
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

Population health and the health care system of a nation are increasingly affected by the processes of globalization. This introductory course provides an overview of the emerging field of global health. Lectures and discussions introduce the principles and goals of global health; measurement tools for global health research, and the contemporary development of global health. Invited speakers address global health theories and practices on a range of topics, such as health care delivery systems, control of communicable and non-communicable diseases, occupational health, environmental health, and the rising influences of global trade policies on health and health inequalities. This course is designed for undergraduate students majoring in global health and students in other departments who may or may not have previous exposure to public health sciences.
