Course Description

This course offers a study of "sustainable development," based on the notion that human development can only be sustainable when environmental boundaries are respected. The course introduces the main concepts, ideas, and theories related to the term sustainable development. The course explores humanity's immense impact on the earth's systems and the underlying drivers of these unsustainable trends. Furthermore, sustainable development requires an understanding that inaction has consequences. Students review some of the contemporary ideas about how to achieve a more sustainable society.
