

COURSE DETAIL

SIGNAL PROCESSING: DESIGN AND IMPLEMENTATION

Country

Sweden

Host Institution

Lund University

Program(s)

Lund University

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Electrical Engineering

UCEAP Course Number

141

UCEAP Course Suffix**UCEAP Official Title**

SIGNAL PROCESSING: DESIGN AND IMPLEMENTATION

UCEAP Transcript Title

SIGNL PROCESS DESGN

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

The course provides solutions to problems in signal processing where design of filters, filter banks, and fast algorithms are in demand. The course presents the fundamentals of wavelets and points to different applications where wavelet analysis is a powerful tool. The student should obtain sufficient insights on theory and application to independently formulate the mathematical problem, to solve it, and to implement the solution for processing of real signals.

Language(s) of Instruction

English
