Course Description

In this course, students are expected to be familiar with ideas and concepts covered in the Adaptability and Wellbeing course units at first and second year levels at the University of Manchester. Topics to be covered include the role of illness and treatment beliefs in health care encounters, how medically unexplained conditions can be explained and managed, ways of improving how health care professionals and patients interact, and risk and decision making. Cutting across these topic areas are the themes of theoretical underpinnings, measurement, and application.
