UCEAP Semester Units

2.70

Course Description

This course introduces the fundamental concepts of the theory of computer science. What does "computing" mean? Are all "computers" basically the same? Can we tell whether our programs are "correct" - and what does "correct" mean? Can we solve problems in reasonable time, and can we tell whether we can? The course concentrates primarily on conceptual understanding, but adds enough detail to allow students to go on to further courses, and it illustrates how the fundamental concepts are reflected throughout the discipline.
