Course Description

With the development of wireless Internet technologies and the increasing usage of emerging networks, digital interconnection technology, artificial intelligence and big data technology in public management, public management and government operations are now facing unprecedented challenges and new development opportunities. This course introduces the evolution of innovation in government operations and public management, as well as the interaction between government operations, management, organizational behavior and innovation. This course will also discuss how the application and development of new technologies affect the followings: government operations, public information policies, public service innovation, administrative and institutional reforms, and the development of relevant laws and regulations.
