BIOPSYCHOLOGY

UCEAP Quarter Units
6.00

UCEAP Semester Units

4.00

Course Description
This course introduces the basic elements of the nervous system, namely the nerve cell, with an emphasis on the mechanisms that allow information to be communicated between neurons and across networks of nerve cells. It also reviews how sensory information is transmitted into the brain and how motor output is engaged. The course focuses on the psychobiology of influences to behavioral change, namely emotion, motivation, and learning.

Language(s) of Instruction
English
