## Course Description

This course explores the application of psychological principles, theories, and methods of research in studying religious behavior, cognition, and motivation, as well as the role of religion in human life. The course draws on the contributions of other fields of psychology and focuses on the attitudes, values, and experiences of people and their relationship with the supernatural. Topics covered include: the emergence of psychology of religion; approaches to the study of psychology of religion; religious experience; morality; coping and adjustment; and functions of religion in adult life.
