UCEAP Course Suffix N
UCEAP Official Title URBAN GOVERNANCE AND ENVIRONMENTAL POLICY
UCEAP Transcript Title URBAN GOVERNANCE
UCEAP Quarter Units 4.50
UCEAP Semester Units

3.00

Course Description

Cities have become major actors on environmental policy. However, the crosscutting nature of environmental problems involves the city in a web of relationships with other levels of government and non-governmental actors. Therefore, the understanding of environmental policy in cities raises the need to unveil the “black box” of the different dimensions of governance (urban, metropolitan, multi-level). The aim of the course is to introduce students to the complexity of implementing public policies in urban contexts through the particular complexities of the environmental issues. For such purpose, the course addresses the basic concepts of policy analysis, the different discussions and theories on governance and orients them towards the specific case of environmental problems in different contexts. Particular attention is placed on air quality, mobility, and climate change.
