2.00

## Course Description

This course examines various pollution problems, including the pollution sources, pollution identification, the dispersion, deposition, and their effects. The impacts on agriculture, forest, fishery, animal and human health are especially expressed with color pictures. The laws and regulatory methods in controlling the pollution are also discussed. Environmental consciousness in individual and the whole society is emphasized. Students are encouraged to do environmental protection through the homework that includes some personal practices and activities, to promote the environmental protection in the country. Text: E.J. Sun, ENVIRONMENTAL POLLUTION AND IDENTIFICATION OF ITS ADVERSE AFFECTS. Assessment: midterm report (40%), final exam (50%), participation and attendance (10%).
