Course Description

The course provides a comprehensive introduction to all branches of oceanography, namely physical, biological, chemical, and geological oceanography, for science students. It also provides a solid foundation for marine aspects of advanced courses in environmental sciences, geography, sedimentology, marine geology, ecology, and meteorology. The course is formally divided into physical, biological, chemical, and geological oceanography but the multi-disciplinary nature of ocean sciences is emphasized through out the course by highlighting the links between disciplines.
