Course Description

This is an undergraduate research course. The students works on a research project under the advisement of a NUS professor. This program allows you to engage actively in research, discussions, intellectual communications and other creative activities. By complementing the conventional classroom learning, UROPS places students at the frontiers of scientific research. Through the typical phases of doing research, you are able to enhance your knowledge in the latest development of science and technology; acquire special communication and presentation skills; experience creative thinking; interact and forge closer ties with the established scientists and members of their groups. We believe that the experience you can gain upon completion of the project will assist you in the preparation for future careers and postgraduate training.
