Course Description

This course introduces environmental communication as an interdisciplinary field of study that examines the role, techniques, and influence of communication in environmental affairs. It studies various forms of environmental communication in the public sphere and in doing so, draw on theory and methods primarily from communication, environmental studies, psychology, sociology, and political science. Topics include environmental rhetoric and culture; environmental interpersonal and intercultural identities; green advertising, public relations, and design; environmental journalism and mass media studies; science and climate communication; green applied media and arts; public health and risk communication; green governance, access to information, and public participation in environmental decision-making; environmental organizational communication studies; and environmental justice, law, and policy.
