GLBL CLIMATE CHANGE

UCEAP Quarter Units
4.50

UCEAP Semester Units
3.00

Course Description

This course considers how to act in times and under conditions of uncertainty, assuming uncertainty as one fundamental feature of politics. This main question is explored through political-philosophical and policy literature with the intention to bring both bodies of literature together. Global climate change and the Anthropocene serve as empirical examples of policy-making in times of uncertainty which are characterized not only by unpredictable futures and non-linear developments, but also by unknown consequences of policies.
