## Course Description

Entrepreneurship is typically approached as a way of thinking and acting, as an attitude or behavior. This course examines entrepreneurship as a manageable process that can be applied in almost any organizational setting. The course explores the many dimensions of new venture creation and growth including the business, technological, financial, legal, human, and ethical considerations in order to foster innovation and new business formation in a variety of settings. The course reviews the background and tools necessary for a solid foundation in terms of the role of entrepreneurs and entrepreneurship needed to function effectively in the 21st century global economy. This course combines both an academic and practical view of the challenges facing entrepreneurs. The course focuses on the creation, evaluation, development, and launch of a new business or venture. Students discuss key issues including the basic questions addressed in the formal venture planning process. Students work in groups to create and pitch a new venture at the end of the course.
