Course Description

This course provides a contemporary view of issues associated with human mental disorders and psychopathology; it introduces and discusses the notion of abnormality in behavior, diagnostic practice, stigma, prognosis, and treatment in human mental disorders. There is discussion of what is known of the nature and aetiology of major mental disorders such as schizophrenia, anxiety, and depression; psychological and biological theories that attempt to account for these disorders; and their prevalence, treatment, and prognosis. This course is taught online.
