PROJECT AND PROCESS MANAGEMENT

**UCEAP Transcript Title**

PROJ & PROCESS MGMT

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## **Course Description**

The development of new products, services, and processes is predominantly carried out in project groups. That means that people from different sectors of the organization are brought together on a temporary basis to accomplish a complex task. The project management part of this course offers an insight in the role of project management in different organizational contexts. Special attention is given to the following issues: project selection, the project manager, project planning, resource allocation, and project control. The process management part of this course deals with operation, strategy, and process management. We define a process to be any transformation that converts inputs to outputs. The process view considers any organization to be a process that consists of interconnected sub processes. This part of the course provides students with the basic concepts that enable them to describe processes in a way that allows them to apply "management levers" on those processes: process flow time, work-in-process, process-efficiency, and so forth.

## **Language(s) of Instruction**

English

## **Host Institution Course Number**

EBC2050

## **Host Institution Course Title**

PROJECT AND PROCESS MANAGEMENT
