5.00

**UCEAP Semester Units**

3.30

**Course Description**

This course provides a study of the financial decisions of both individuals and companies, and the behavior of capital markets. It covers investment theory, portfolio selection, aversion to risk and decisions under uncertainty, and market efficiency. Financial models, including the CAPM and Black-Scholes model, are discussed both theoretically and applied empirically. Further topics include corporate finance through financial policies, the cost of capital, and the role of debt and taxes.

**Language(s) of Instruction**

Spanish
