UCEAP Course Suffix
UCEAP Official Title THEORIES OF URBAN DESIGN
UCEAP Transcript Title URBAN DESIGN
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

The course focuses on selected theories, discourses, and concepts for urban design. It encompasses visions and plans for the morphology of cities, the interplay with social and ecological sustainability, and ideas about the ideal city and good urban life from the 19th century through today. The course concentrates on three main themes of contemporary urban development: pre-modern to post-modern urban design, place making and the role of public space, and sustainable urban development and urban nature. It discusses central paradigms and various approaches to city design and re-design. The contemporary city is used to illustrate how urban design concepts and models have been operationalized and have influenced practice.
