UCEAP Transcript Title GEOG INFO &THINKING
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course provides an introduction to the conceptual base of Geographic Information Science, the practical use of geo-spatial data, and various societal issues related to the use of Remote Sensing and Geographic Information Systems. It covers key concepts and principles behind the development and application of these technologies. The course explores a range of application of GIS for analysis and display of spatial data, focusing on non-programmable solutions.

Language(s) of Instruction
English
