Course Description

This course introduces students to applied collection research in a museum context. It focuses on collection research, including object-based methodologies, archival approaches, participant observation, material culture ethnography, and multispecies perspectives. Throughout, the emphasis is on linking theory with practice across a variety of object-based contexts, and encouraging students to think critically about individual and group contribution. Students learn about production processes to engage with the ethical and interpretative choices underpinning current museological practice, as well as to develop and defend their own curatorial decisions.
