COURSE DETAIL

SOCIAL SCIENCE DATA ANALYSIS AND PROGRAMMING

Country
Norway

Host Institution
University of Oslo

Program(s)
University of Oslo

UCEAP Course Level
Upper Division

UCEAP Subject Area(s)
Computer Science

UCEAP Course Number
104

UCEAP Course Suffix

UCEAP Official Title
SOCIAL SCIENCE DATA ANALYSIS AND PROGRAMMING

UCEAP Transcript Title
DATA ANALYSIS&PROGM

UCEAP Quarter Units
8.00

UCEAP Semester Units
5.30

Course Description

The course offers an introduction to programming-based problem solving for social scientists. The course introduces a number of problems and solutions in social science data processing with applications in R. The course begins with a number of general programming topics, followed by efficient processing of different data structures and how data can be combined using SQL and Tidyverse. Secondly, the course looks at special challenges related to space and time. The spatial dimension introduces GIS techniques. Towards the end, the course sees how machine text analysis can be used to automate data collection and to look at how we can effectively visualize different types of data. The course provides a good basis for independent work with social science information. The course requires students to have completed a course in research methods and statistics as a prerequisite.
