COURSE DETAIL

INTERMEDIATE ECONOMICS 2
Country United Kingdom - England
Host Institution University of Bristol
Program(s) University of Bristol
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Economics
UCEAP Course Number 152
UCEAP Course Suffix
UCEAP Official Title INTERMEDIATE ECONOMICS 2
UCEAP Transcript Title INTERMEDIATE ECON 2
UCEAP Quarter Units 8.00
UCEAP Semester Units 5.30

Course Description
This course explores Bayesian games and considers adverse selection and moral hazard at a more formal level. In macroeconomics, the course studies long-run fiscal policy (including pensions systems), aggregate investment, and modern theories of unemployment. Students examine notions of strategies, equilibrium, and beliefs in games and solve formal games, including dynamic games with asymmetric information. Students formalize an economic problem using the models presented and use the models to undertake analyses as well as understanding the long-run implications of fiscal policy. Students also analyse key issues such as sovereign debt and pensions reforms using a simple OLG model, and they examine key dynamic models of investment and how to use them to explain real issues.
