UCEAP Transcript Title LANGUAGE & REALITY
UCEAP Quarter Units 3.00
UCEAP Semester Units 2.00

Course Description
This course provides an increased understanding of the important relationship of language to constructs of reality. A variety of topics are explored, all sharing one common theme, i.e. language as a kind of virtual reality. The provides an increased appreciation of how different languages and narratives serve as different prisms for interrogating social (and even physical) reality, having considered a wide array of examples in class and in their own reflection. The main themes of this course are the reshaping of social space-time as a result of innovations in human interaction and linguistic production, as well as the relationship between language, mind and reality. Historical, contemporary and possible future developments in communication are explored from a linguistic, physical and philosophical perspective.
