6.00

**UCEAP Semester Units**

4.00

## Course Description

To study culture, we need to read books, visit historical sites, and talk to one another. Can we complement these approaches with IT tools? This digital humanities course teaches basic web design to create digital archives and dip our toes into some computational tools to study culture. But isn't it controversial to use data science to study culture? Can you reduce the diversity, and complexity of human culture to number and graphs? Assessment: Individual project, group project, and presentation, participation.
