CONSERVATION OF FOREST ECOSYSTEMS AND WILDLIFE

### **UCEAP Transcript Title**

FOREST ECOSYSTEMS

### **UCEAP Quarter Units**

5.00

#### **UCEAP Semester Units**

3.30

### **Course Description**

This course is an introduction to the natural history, ecology, and conservation of forest biodiversity with particular focus on vertebrate wildlife from South American temperate ecosystems. It examines the relationships between forests, wildlife, and people on a local, regional, and international scale. This course integrates case studies in order to discuss current research problems.
