COURSE DETAIL

PLANET EARTH
Country Singapore
Host Institution National University of Singapore
Program(s) National University of Singapore
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Environmental Studies Earth & Space Sciences
UCEAP Course Number 113
UCEAP Course Suffix
UCEAP Official Title PLANET EARTH
UCEAP Transcript Title PLANET EARTH
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

The course provides an overview of geology, the science of the earth. An understanding of geology is important to many disciplines, providing information about the physical and chemical processes that determine the distribution of resources, location of hazards, operation of surface processes and the interaction between engineering structures and earth surface materials. The four components of the course begin with consideration of the earth's structure and the role of plate tectonics, before considering the nature of earth surface materials and the functioning of earth surface systems.

Language(s) of Instruction
English
