Course Description

This is an individual study project. Students must have a well-developed idea of the theme of the study. A faculty teacher is appointed as supervisor, and an agreement is signed between the student and the teacher describing the title, contents, ECTS credits of the study. A supervisor normally meets with the student between two and four times in order to discuss the progress of the individual study, or any problems encountered. Most supervisors also choose to read and comment on parts of the study. Students applying to do an individual study must submit a detailed project description with their application. Exams for Individual Study Projects may be oral, written or a combination of the two. This version of the course is worth 6 quarter units and corresponds to a workload of 206 hours.
