UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

This course examines the psycholinguistic processes that underlie the acquisition, understanding and production of speech as well as the organization of these processes in the brain. It discusses the traditional debates related to the genesis of language, its evolution and its acquisition. The course also reviews known speech processing models in the area of psycholinguistic studies that describe the processes of understanding and production of both oral and written discourse.

Language(s) of Instruction
Spanish
