6.00

UCEAP Semester Units

4.00

Course Description

This course addresses some of the major problems of economic development in low- and middle-income economies: the relationship between poverty, inequality, and economic growth; long-run growth and structural change; microeconomic issues in agricultural development, including theories of peasant resource allocation and farm size and efficiency; market performance in the rural and informal sectors of less developed countries; industrialization and trade policy; the roles of monetary policy and foreign aid in resource mobilization; stabilization and structural adjustment; and investment in human capital.
