

# COURSE DETAIL

## INTRODUCTION TO STEM CELLS

**Country**

United Kingdom - England

**Host Institution**

King's College London

**Program(s)**

King's College London

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Biological Sciences

**UCEAP Course Number**

132

**UCEAP Course Suffix****UCEAP Official Title**

INTRODUCTION TO STEM CELLS

**UCEAP Transcript Title**

INTRO TO STEM CELLS

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

The overview of knowledge in the field of stem cell science provided in this course should enable students to follow and understand the potential use of stem cells in cellular therapy, regenerative medicine, toxicity screening, and drug development. The course covers cellular mechanisms of stemness as well as the ethical, legal, and regulatory issues associated with stem cell based therapy, human embryo research, and cloning.

## Language(s) of Instruction

English

## Host Institution Course Number

5BBL0227

## Host Institution Course Title

INTRODUCTION TO STEM CELLS

## Host Institution Campus

King's College London

## Host Institution Faculty

## Host Institution Degree

## Host Institution Department

Department of Physiology
