### **Course Description**

The course introduces field study and geological surveying methods. The teaching material is lecture based and includes the concept of field geological surveying and the Heng-Chun Peninsula, which the class embarks on a four-day trip to Southern Taiwan to examine the rock and land formations of the area. Field practice is held during the semester, and performance during the field observation is the main determinant for performance assessment. Students who cannot participate in the field trip should not enroll in the course.
