Course Description

This course covers the meaning and relevance of intermediate microeconomics concepts including consumer theory, production theory, market competition, market structure, welfare theory, game theory, public goods, externality, labor market, intertemporal choices, risk and uncertainty, and principal-agent programs. Topics include the theories of the consumer and the producer; the study of individual markets, including perfect competition, monopoly, and oligopoly; efficiency properties of the competitive system; and some circumstances in which competitive markets may fail to produce efficient outcomes. Text: Steven E. Landsburg, PRICE THEORY. Assessment: quizzes, midterm exam, final exam, presentation and discussion.
