COURSE DETAIL

SUSTAINABILITY AND RESILIENCE IN HISTORY
Country Netherlands
Host Institution Wageningen University and Research Center
Program(s) Wageningen University
UCEAP Course Level Upper Division
UCEAP Subject Area(s) History Environmental Studies
UCEAP Course Number 125
UCEAP Course Suffix
UCEAP Official Title SUSTAINABILITY AND RESILIENCE IN HISTORY
UCEAP Transcript Title HISTSUSTAINRESILIEN
UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

This course introduces the fascinating field of environmental history, focusing on the tensions between economic growth, resource scarcity, and environmental degradation in the distant past as well as in present-day societies. The course pays ample attention to the transition from pre-industrial to industrial modes of production and the environmental consequences thereof - the making of the Anthropocene. Analogies are drawn from the collapse of ancient civilizations to contemporary environmental problems, such as global warming and mineral resource depletion. The course also specifically addresses the various strategies that historical civilizations have developed in order to survive climate change, deforestation, soil erosion, or other ecological threats to human livelihood. Finally, the course addresses the emergence of present-day environmental consciousness in the wake of modern urbanization, industrialization, and unprecedented demographic growth.
