Course Description

This course is part of the LM degree program and is intended for advanced level students. Enrolment is by consent of the instructor. The course provides a historical overview of the major figures of Italian Renaissance architecture from 1400 to 1600—including Brunelleschi, Alberti, Bramante, Raphael, Antonio da Sangallo the Younger, Michelangelo, Peruzzi, Giulio Romano, Sanmicheli, Sansovino, and Palladio, as well as an outlook on a selection of European Renaissance architects. The architects are analyzed within the cities or countries they operated and are compared with the cultural, social, and political local context. The second part of the course is an overview on a selection of European courts and on the role of humanistic architecture at the dawn of colonialism. Issues such as local antiquities, revival and survival, rules and license, theory of architecture, drawings, and graphic conventions are addressed throughout the course.
