BIODIVERSITY CONSRV

**UCEAP Quarter Units**

4.50

**UCEAP Semester Units**

3.00

## Course Description

This course focuses on the fundamental knowledge for conservation biology by introducing: (1) Biodiversity; (2) Threats to biodiversity, and (3) the approaches to reduce the threats and restore biodiversity. The lectures cover principles and theories of ecology. Given the interdisciplinary framework of conservation biology, lectures cover economics and politics, thereby encouraging students to evaluate ecology findings from different viewpoints.
