Course Description
This course provides a general overview on Information Technology Law and how it has evolved in order to respond to the rapid technological and social change. The first module introduces the key concepts of the relevant legal systems. The second module explores the relationship between law and technology, highlighting the most critical legal issues raised by technological developments. Particularly, a focus is devoted to the analysis of the evolution of the legal concepts of sovereignty and regulation in the age of globalization. Finally, the third module of the course focuses on the law of the governance of the Internet. After a general framework, protection of fundamental rights (freedom of speech and data protection) and the emergence of new rights and actors on the Internet are examined.
