COURSE DETAIL

PERSPECTIVES ON PAIN AND NERVOUS SYSTEM DISORDERS
Country United Kingdom - England
Host Institution King's College London
Program(s) King's College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Biological Sciences
UCEAP Course Number 118
UCEAP Course Suffix
UCEAP Official Title PERSPECTIVES ON PAIN AND NERVOUS SYSTEM DISORDERS
UCEAP Transcript Title PAIN&NERVOUS DISORD
UCEAP Quarter Units 12.00
UCEAP Semester Units 8.00

Course Description

The course enables students to achieve an in-depth understanding of interactions which underlie the function of the nervous system in disease states, evaluating different approaches employed in the research on pain and human nervous system disorders. It provides students with a sample of neurological and psychiatric disorders, drawn primarily from research carried on at King's College London. From the analysis of these samples, students are expected to achieve an understanding of the complexity of research in human nervous system disorders and the necessity of an interdisciplinary approach to tackle such complexity.

Language(s) of Instruction
