Course Description

This is course is a study of cross-cultural issues in personnel psychology. The course discusses topics including an overview of recruitment and selection (methods, cognition, personality, motivation), job performance (appraisal and management), training, and career development (career calling); key concepts, theories, and issues of the cross-cultural approach to the study of personnel: effect of culture on organizational process (recruitment, selection and assessment) and individuals' characteristics (personality, cognition, values, motivation and career calling); applying personnel psychology, cross-cultural psychology, and diversity management to real-world contexts and issues (e.g., diversity training, staffing and selection bias); and reflecting on the role of culture in working with culturally diverse personnel. The course requires a basic knowledge of personality traits, motivation, intelligence, psychological testing, and industrial and organizational psychology as a prerequisite.
