UCEAP Transcript Title URBAN CITIZEN& SUST
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course examines urban environments from the dual perspectives of citizenship and sustainability. The course has three parts. The first part examines the intersection of urban environmental change with questions of citizenship and justice. Part two considers key urban environmental issues such as energy, transport and food, and how cities and citizens might address stresses and shocks in these systems. Part three studies new models for governing emergent urban environmental challenges. Throughout the semester, a practical project involves a research project with real-world partners to introduce key skills related to working in collaboration with external organizations.
