Course Description

In the post-industrial and information age, societal problems are increasingly complex and require systems thinking and design approaches that can deal with their complexity. This course introduces a systems design approach to complex social-ecological-technical problems. The scope of the course encompasses the theories, methodologies, and case studies related to systems thinking and design. This class is designated as a Social Innovation Certificate (SIC) course. The course contents and practices are related to social innovation and solving social problems. The Institute of Higher Education Innovation (IHEI) may collect student assignments and course contents for further purposes. For more details regarding the SIC, please visit the IHEI's website,http://ihei.yonsei.ac.kr.
