## Course Description

The teaching objective of this course is to identify and clarify the basic concepts, principles, interrelationships and applicable conditions of insurance; Summarize the basic knowledge system of insurance, and understand the representative research results in related fields; Understand the main ideas in the establishment and development of the basic theory of insurance. Integrate the insurance knowledge system and establish an organic link between the knowledge modules; And establish contact with different disciplines (such as economics and psychology). Recognize and optimize their own risk thinking, as well as the ability and thinking mode related to observation, thinking and creation; Understand the tools used by others to deal with risks, exchange experiences, compare and accept the differences and diversity of each person's understanding and thinking, and learn from each other.

This course describes the most general laws, basic theories, principles and methods of insurance. This course mainly includes four knowledge modules: basic concepts and principles of insurance, property and liability risk and insurance, life and health risk and insurance, and insurance supervision. Through the study of this course, students will have a comprehensive understanding of the basic principles of insurance and China's insurance market, fully grasp the emergence, development and market laws of insurance, improve college students' risk awareness and insurance awareness, and lay a professional foundation for other courses of insurance.
