6.00

**UCEAP Semester Units**

4.00

## Course Description

The ancient Greek world is well known for its remarkable political developments, striking military successes and lasting cultural achievements, yet the economic base which sustained all these things has long been regarded as a simple agricultural subsistence economy, typical of the pre-industrial world. This course examines whether the evidence for economic development across Greece in the archaic period (c. 750-450 BC) and the economic systems of Athens and Sparta in the classical period (c. 450-300 BC) supports that characterization or suggests a more complex picture.

## Language(s) of Instruction

English

## Host Institution Course Number

HIST0507

## Host Institution Course Title

AN ECONOMIC HISTORY OF ANCIENT GREECE
