3.00

### **Course Description**

This course examines the rules of economic activity in an open economy, focusing on international trade, multinational corporations, international investment, international finance, and international Macroeconomics. Based on the facts of China's economic opening-up, economic globalization and the development of international economics, this course focuses on the theories and policies of international trade, the determination and change of exchange rate, the adjustment methods of international payments, macroeconomic policies under the open economy conditions, and the international monetary system. Through the course, students can rely on the theory of international trade, international investment, exchange rate theory, theory of international balance of payments and international macroeconomic theory, using the modern economics analysis method, combining the data between macroeconomic and microeconomics to explain international economic phenomena.
