WATER AND DEVELOPMENT
Country United Kingdom - England
Host Institution King's College London
Program(s) King's College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Geography Environmental Studies
UCEAP Course Number 128
UCEAP Course Suffix
UCEAP Official Title WATER AND DEVELOPMENT
UCEAP Transcript Title WATER&DEVELOPMENT
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

The course explores the interface of water resources management and sustainable development through the perspective of politics of water use and allocation. The course first examines different types of water and their uses and relevance to sustainable development. Secondly, the class examines politics of water use and allocation at the local, national, and international levels through issues of community irrigation, Integrated Water Resources Management and international transboundary river basin agreements. Particular focus is on the actors and institutions involved in water governance at these spatial scales. Thirdly, through discussions, group work, and poster presentations, students assess the policy responses to the problems of water resources management in developing country contexts.
